Re: SAG® 470 - FDA Compliance Letter

Dear Ms. Abraham,

Thank you for your interest in Momentive Performance Materials, and the products and services we provide. This is to certify that SAG® 470 Silicone Antifoam Emulsion meets the requirements of the following 21 CFR FDA Regulations:

- | | |
|----------|--|
| 175.105: | Adhesives |
| 176.170: | Components of paper and paperboard in contact with aqueous and fatty foods |
| 176.180: | Components of paper and paperboard in contact with dry food |

The CFR sections for all components of a product should always be consulted in complete context before any conclusion is made as to the allowed regulated use. Please note that substances listed in 21 CFR may carry limitations and/or use restrictions. Consideration for other sections of 21 CFR would require further evaluation. Please consult the FDA regulations for other specifications and limitations, which may apply. The customer has the sole responsibility for determining that their product complies with all applicable FDA specifications and limitations and is fit for food contact use.

Do not hesitate to contact me if you have any questions.

Sincerely,

Shahzad Arshad
